

# RI-JET 375 ECO-MATT WHITE AP940 PERMAMENT WK135 4-GL2F-11307

**100µ PP film, matt finishing. Designed for billboards, shop windows, POP displays and all surfaces related to visual communications.**

The first "green generation" product for digital printing, ensuring exceptional performances in terms of printability, conformability, durability and opaqueness. RI-Jet 375 is not only sustainable and compliant with the regulations for all market segments in which synthetic non-PVC films are required, but it is also an environmental friendly product. The production process is aimed at reducing the carbon footprint since 30% of the weight of the film does not derive from oil and the face material is produced in a zero waste industrial facility (ISO 14001 certified).
